McIntosh

THE WORLD-V HI-FIDELITY

Since 1949, no other company has done more to create superior sounding components than McIntosh. Since their inception they have developed leading-edge technologies that no other manufacturer has then or since, such as Power Guard that prevents harmful distortion from damaging your loudspeakers, and Sentry Monitor, which prevents the amplifier from being damaged from a dead short. Hand built, not mass produced, each McIntosh amplifier is a testament to creating audio products that stand the test of time. Made to last, a McIntosh amplifier is the sound of music itself! Regardless if you purchasing a solid-state or vacuum tube amplifier, a McIntosh amplifier will be the best investment you can make in your audio system. From Monoblock amplifiers or a stereo amplifier, or multi-channel Home Theater, there is a perfect choice for any system.

STEREO POWER AMPLIFIER

McINTOSH MC-312 STEREO POWER AMPLIFIER

300 Watts per Channel, Sentry Monitor, Power Guard, Auto-Former Speaker Outputs.

McINTOSH MC-462 STEREO POWER AMPLIFIER

McINTOSH MC-611 MONO BLOCK AMPLIFIER

600 Watts, Quad Balanced, Power Guard, Auto-Former Speaker Outputs.

McINTOSH MC-275VI VACUUM STEREO POWER AMPLIFIER

The most iconic tube amplifier ever created! 75 Watts per channel, Auto-Former Outputs.

McINTOSH STEREO PREAMPLIFIERS

No other company has the experience or know-how than McIntosh when it comes to designing the best sounding and most flexible preamplifiers! Delivering superior audio performance with patented electro-magnetic switching, for silent noise free operation while eliminating any type of routine maintenance of cleaning controls. Many of their preamplifiers include DAC's for connecting your Digital sources as well, such as a computer for the best sound. These DAC's are even upgradeable in the future preventing any type of obsolescence. Offering choices in both vacuum tube or solid-state, a McIntosh preamplifier will be the best choice you can make for your audio system. Built in the USA since 1949!

McINTOSH C-22 STEREO VACUUM TUBE

A classic is reborn! A full vacuum tube design, with both MM and MC Phono Stages, adjustable cartridge loading on front panel. Silent Input switching

McINTOSH C-53 STEREO SOLID-STATE

McINTOSH C-2700 STEREO SOLID-STATE

Full vacuum tube design, Digital DAC Included (Upgradeable in the future), Twin Chassis design in a single unit, Silent Input Switching, VU Meters

WIDE LEADER IN TECHNOLOGY

McIntosh

McINTOSH INTEGRATED AMPLIFIERS

Usually when a manufacturer develops an Integrated Amplifier, it is usually a compromise in performance to obtain a certain price point. That is not the case with McIntosh Integrated Amplifiers! Built to the same high standards as their separate components, and never designed for a price point, McIntosh Integrated Amplifiers routinely out-perform separate components from other companies. While retaining core technologies and performance carried over from their separates, such as Power Guard to prevent distortion from damaging loudspeakers. Some of the new McIntosh Integrated Amplifiers even feature High-Quality DAC's or Digital to Analog converters to allow you to connect various Digital sources including your computer for the best possible sound quality. More than enough inputs to assemble the most sophisticated systems, McIntosh Integrated Amplifiers are built to last while delivering a musical performance that is second to none!

MA-252

110 Watts per Channel,
Hybrid Vacuum Tube/
Solid State design

MA-9000

300 Watts per Channel, Eight

solid state design, 350
watts per channel, eight
band tone controls,
Upgraded DA2 DAC
with Digital Inputs

McINTOSH CD TRANSPORTS

Most of all of the new McIntosh Preamplifiers, and their Integrated Amplifiers, and Stereo Receiver now feature built-in Ultra-High Quality DAC's (Digital to Analog Converters). This DAC can even be upgraded at any time to help prevent any obsolesces in the future. Now all you need to purchase to complete your McIntosh system is a CD/SACD Transport Unit. A transport is the same as a CD Player but does not have a built-in DAC; since it is now built in to Preamps, etc. there is no need to buy a CD Player, saving you money.

McINTOSH MCD-901

Universal Player Blu-Ray, DVD,
CD, SACD, DVD-Audio, 4K Video
Upscaling, XLR, RCA, HDMI Outputs

McINTOSH MCD-600 CD/SACD PLAYER

CD/SACD Player, Quad-Balanced
32 Bit/DAC, Digital Inputs

McINTOSH STEREO RECEIVER

The McIntosh MAC-7200 was designed to deliver sound quality comparable to separate components, but in a one chassis design to save valuable shelf space. With 200 Watts per channel, featuring their patented Autoformer design, will power any speaker and have them sound wonderful. The MAC-7200 provides you with enough inputs and the latest modern technology to keep all of your music components connected and sounding great. Including an ultra-high quality 32 Bit/192 KHz DAC for your Digital sources. And a wonderful sounding tuner completes this amazing receiver.

McINTOSH MAC-7200

GoldenEar Technology®

A Passion for Sonic Perfection™

A Passion for Sonic Perfection

In the summer of 2010, Sandy Gross, co-founder of two of the most successful lines in the history of the audio industry, announced the launch of a new loudspeaker company, Golden Ear Technology. Their recipe for success is simple: the best products offered only by the best specialty dealers. Featuring their rave-reviewed Ribbon Tweeter delivers a sound that's open and transparent to the music, coupled with powered woofers make for a perfect choice for any high-quality music or Home Theater system. All of their product offerings have routinely been rave reviewed by all of the leading audio publications, and music lovers alike. And have been compared with other speaker offerings costing as much as ten or more times their selling prices.

TRITON ONE R

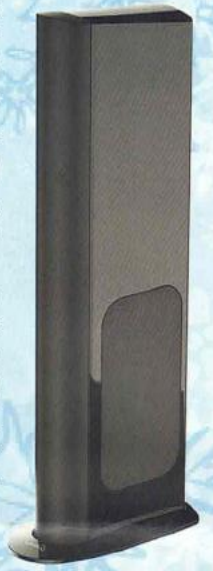

Second only to their Reference, outperforms many other loudspeakers costing five to ten times their price point. Simply connect them to any system, and the music will come alive. Driver complement: Three 5x9" Long-Throw Subwoofers, four 7x10" Quadratic Planar Infrasonic radiators, two 5 1/4" High-Definition cast basket Mid/Bass drivers, one High-Gauss Neodymium High-Velocity Folded Ribbon (HVFR) Tweeter, Subwoofer Amplifier power 1600 Watt Digital/DSP.

\$6,598.00/Pair

TRITON REFERENCE

Is truly a loudspeaker that lives up to its name, a Reference loudspeaker in terms of musical performance without the exorbitant price. With Three 6x10" Long-Throw Quadratic Reference Subwoofer drivers, Four 9 1/2" x 10 1/2" Quadratic Planar Infrasonic Radiators, Two 6" High-Definition Cast Basket Reference Mid/Bass Drivers, One-High Gauss Reference High-Velocity Folded Ribbon Tweeter, along with a 1800 Watt Digital/56 Bit DSP Subwoofer Amplifier.

\$9,998.00/Pair

TRITON 2+

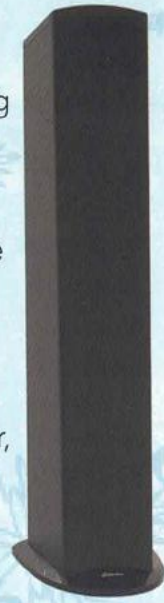

Delivers amazing detail, thanks to their famous HVFR ribbon tweeter; it's an Audiophile dream, with Built-In 1200 Watt Digital Amplified powering two 5 x 9 Long-Throw Quadratic subwoofer bass drivers, with two 7 x 10" Quadratic Planar Infrasonic radiators, two 4 1/2" High-Definition cast-basket MVPP Upper-Bass mid drivers, and one High-Velocity Folded Ribbon Tweeter.

\$3,850.00/Pair

TRITON FIVE

Is their largest non-amplified floorstanding loudspeaker with two passive 6 Inch High-Definition Cast-Basket Bass/Midrange Drivers, along with four 8" Planar-Sub Bass radiators, One High-Velocity Folded Ribbon (HVFR) Tweeter, Recommended Amplifier Power 15-400 Watts RMS.

\$2,198.00/Pair

TRITON SEVEN

Delivers a room filling sound from an attractive slim line cabinet design that doesn't dominate your living space, with two 5 1/4" Bass/Midrange Drivers, and two 8" Planar Sub Bass radiators, and one High-Velocity Folded Ribbon (HVFR) Tweeter, Recommended Amplifier Power 10-300 RMS.

\$1,538.00/Pair

SUPERSUB X

Is one of the best subwoofers in its class, with amazing deep bass, and extremely Omni-directional sound. Driver Complement: Two 8" Long-Throw High-Output bass drivers, Two 10 1/2" "x 9 1/2" Quadratic Planar Infrasonic Radiators. Amplifier: 1400Watt Force Field Digital amplifier, frequency response 12 Hz-250Hz.
