**McIntosh Laboratory** designs and builds the finest home theater and stereo components available today. Hand-built in the United States since 1949, McIntosh components are synonymous with the words "highest quality." Every component is created with capacity so great that it will never be operated at or near its stress point. PowerGuard ensures an amplifier will never distort; output autoformers protect speakers in the unlikely case of output circuit failure. State-of-the-art electromagnetic switching silently provides perfect control. The famous blue glowing wattmeters display real output. And, most important, the sound of each component is fabulous, with unmatched soundstage, clarity and dimensional imaging. You can tell that for over 54 years, McIntosh has easily deserved its reputation as "The Best."

### The Best in Home Theater!

Music and movies as they were meant to be experienced! These instruments provide the greatest audio reproduction available, in addition to their unparalleled video capability! McIntosh's **MVP-851** DVD player, **MX-134** home theater controller and **MC-206** six-channel power amp are the ultimate in home

MVP-851 DVD player

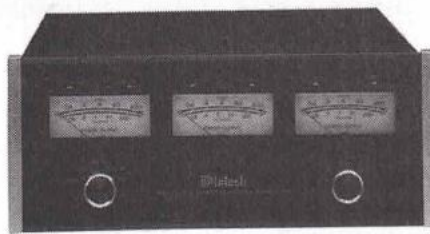

entertainment! The DVD player boasts high-resolution video processing, multi-

MX-134 home theater controller

channel audio formats, and unmatched sound quality for finest music and sound

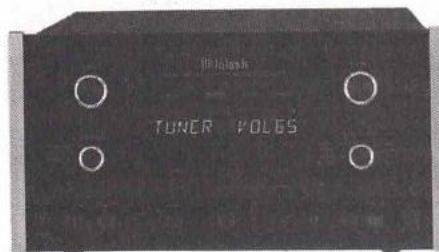

playback! The famous MX-134 is the best home theater controller available. Its powerful dual 24-bit processors

MC-206 six-channel

decode all the latest surround sound formats. The brand-new **McIntosh MC-206** is the perfect six-channel home theater amplifier, and matches the MX-134. Specially designed for the 6.1 format, this is a 1,200 watt amp! Each of six channels delivers 200 watts of power, protected against distortion by patented PowerGuard circuitry.

MVP-851 **\$3,600.00** MX-134 **\$7,100.00**  
MC-206 **\$4,600.00**

MHT-100 Audio/Video Receiver

### MHT-100 Audio/Video Receiver

"The McIntosh of home theater receivers"! The awesome sonic potential of DVD movies with Dolby Digital and DTS begs for McIntosh-quality reproduction, with eight power amp channels (140 watts each), six for home theater and two for Zone B. With 24-bit DSP processing for Dolby Digital, DTS, Pro Logic and 6.1 Expanded Surround, the MHT-100 combines the brains of the acclaimed MX-132 controller/processor with the brawn of McIntosh power amps! **\$4,999.00**

### MA-6900 integrated amplifier

The preamp section includes electromagnetic switching, a graphic equalizer and inputs for CD, video, tape and – yes,

MA-6900 integrated amplifier

phono! Get a "bulletproof" 200-watt per channel power amp on the same chassis with blue wattmeters, PowerGuard and autoformers. Drive your loudspeakers to exquisitely controlled concert-hall volume with the MA-6900. This is the perfect upgrade for those old separates! **\$4,599.00**

MA-6500 integrated amplifier

### MA-6500 integrated amplifier

All the premium features you dream of in a convenient integrated amp! An excellent audiophile design, with 6 inputs, including phono, 120 watts per channel and PowerGuard. Perfect for compact spaces where versatility is a premium! **\$3,099.00**

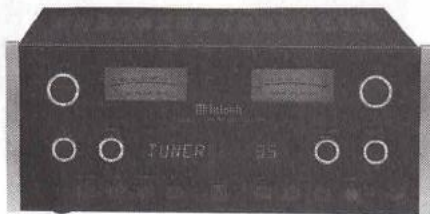

MCD-205 compact disc changer

### MCD-205 compact disc changer

The innovative design of the MCD-205 incorporates a precision disc changing mechanism that stores discs internally. The mechanism loads quietly and quickly while contacting only the edge of the discs to guard against damage. Advanced 24-bit digital to analog converters and a sophisticated power supply yield true audiophile performance once thought possible only in a single disc system. **\$2,599.00**

**McIntosh 21st Century Tube System - The Heritage Series**

C-2200 tube preamplifier

MC-2102 tube power amplifier

Famous for the ultimate in tube equipment, McIntosh introduces the harmony of tube amplification for a new generation: the warmth and musicality of tubes meets the latest technology. The new **C-2200** tube preamplifier and **MC-2102** tube power amplifier (100 watts per channel, 200 watts bridged) are beautifully designed and crafted to be the best sounding McIntosh tube products ever built!

C-2200 **\$4,599.00** MC-2102 **\$6,099.00**

C-45 audio control center

**McIntosh Preamplifiers**

The **C-45** audio control center was designed for the music lover. State of the art electromagnetic switching has virtually eliminated all preamp noise. Also included is a high-performance phono input, and dual 6-channel inputs for the latest multi-channel digital audio formats, including DVD-Audio, SACD, Dolby Digital and DTS Audio/Video.

**\$3,599.00**

With the **C-46**, McIntosh has created an

C-46 audio control center

elegant combination of audio purity and flexible control. Programmable source selection and logic driven electromagnetic switching, listen and record selectors with independent processor loops and an 8-band program equalizer all add to this preamp's incredible flexibility.

**\$4,349.00**

**McIntosh Power Amplifiers**

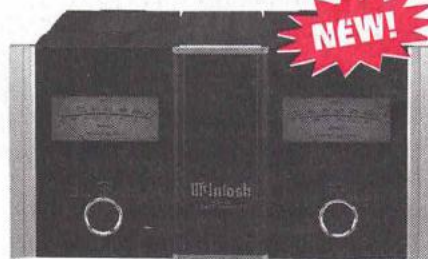

Why buy a McIntosh power amplifier? They are designed to sound better and last longer than any other amplifier. They are beautifully hand-crafted, made from the best materials, and finished with a laser-etched, front glass panel and blue-illuminated peak-responding wattmeters that indicate true output. They are engineered with such great capacity they will never be stressed. They come with a collection of technologies that enhance performance and reliability and protect the amplifier and the loudspeakers. In addition to PowerGuard and autoformers, they include Sentry Monitor, which protects the amp against current fluctuations. Also included is DC failure protection, protecting speakers against unlikely output circuit failure. Thermal sensors protect against overheating if cooling air is blocked. Turn-on delay and soft-start inrush protection eliminates component stress during turn-on. The soundstage is

incredible, so rich and three-dimensional you are totally immersed in a fantastic emotional musical experience every time! In short, a McIntosh power amplifier is the most intelligent audio investment you can make!

MC-252 power amplifier

**MC-252** - With 250 watts per channel into 2, 4 or 8 ohms. The two channels can be bridged into a single 500 watt channel. **\$3,795.00**

MC-402

**MC-402** - Producing a minimum 400 watts per channel in stereo, 800 watts in mono, the MC-402 delivers power that is fully balanced from input to speaker output. **\$5,099.00**

MC-602

**MC-602** - If you are looking for huge amounts of bulletproof power, here it is! With 600 watts per channel, and a balanced input signal to noise ratio of 134db. **\$8,099.00**

**B&W — Listen and You'll See**

Bowers and Wilkins of England, superlative manufacturers of exquisite loudspeakers, offer the most beautiful, refined and best-performing speakers at every level of application, from house-shaking home theater to all the subtle details in music. Indeed, due to their unparalleled capabilities, B&W speakers are used as the monitors of choice in over 80 percent of the world's recording studios, and are now the speakers of choice for movie soundtrack mix-downs! As well as being an instrument of sound, a B&W loudspeaker is also a piece of classic furniture that can blend into the complex environment of the home. Best of all, from \$300.00 to over \$11,000 per pair, each B&W speaker system is designed and built with the same goal in mind — to provide you the sound, design and craftsmanship you deserve — the finest!

**B&W Technology**

How can B&W speakers be made to sound so transparent, so natural — in effect, to “disappear”, leaving only musicians to play in a live command performance for you? B&W research and development concluded that certain cabinet designs, driver design and materials were essential to create transparent speakers. They engineered internal cabinet brace and sound flow configurations, coupled with driver materials like Kevlar and cobex, for unrivalled clarity. Their famed Nautilus technology, which employs tubing applied to the rear of drivers to draw away unwanted radiation from the rear of the driver diaphragm, results in more natural, focused sound. In fact, every B&W tweeter uses the Nautilus technology for the most accurate high frequency response.

**New from B&W**

The Stereo Shop has always been known for having the remarkable Bowers and Wilkins speaker line from England, perhaps the best speakers

available. And now they introduce their new line of speakers, each level incorporating much of their famed cabinet, driver and “Nautilus” technology used to eliminate coloration, leaving pure, clear music as it was meant to be heard!

**B&W DM 303**

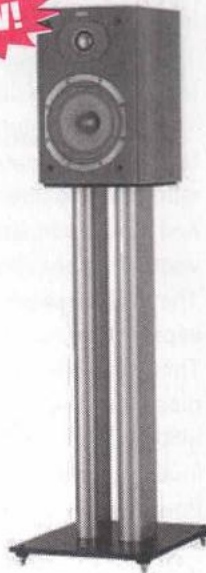

Let's begin with the most affordable B&W speaker. This small bookshelf system may seem typical, but it is one of the finest small speakers available. It employs the Nautilus tweeter, and its cabinet technology includes dimpled surfaces for optimum sound wave flow. The DM303 can be used in nearly any system, small or large, providing rewarding sound and endless hours of musical enjoyment. Listen to music as it was meant to be heard, with this beautifully made and affordable small speaker! **\$149.00ea**

DM 303

**DM 600 Series 3**

The next step up from the DM 303 is the new DM600 Series 3, with the patented Kevlar midrange/bass driver. From bookshelves to floor standing towers, the new 600's are more transparent than ever! Midrange/bass drivers feature well-proven Kevlar cones while bass drivers benefit from rigid aluminum. Tweeters have improved ultrasonic performance and feature Nautilus tube loading for clarity and openness. Finished in black ash or Sorrento oak.

DM 600 S3

DM 602 S3

**DM 600 S3** A very compact bookshelf speaker with 5 inch woofer **\$175.00 ea**

**DM 601 S3**

A compact bookshelf speaker, with 6.5 inch woofer **\$225.00 ea**

**DM 602 S3**

Bookshelf size, but with a larger 7 inch woofer **\$295.00ea**

**DM 603 S3**

A small tower, with two 6.5 inch drivers **\$495.00ea**

**DM 604 S3**

A tower system with two 7 inch bass drivers, and Kevlar bass/midrange **\$695.00ea**

DM 603 S3

LCR-600 S3

Also available are several matching center channel speaker models and subwoofers. This provides tremendous design flexibility and affordability in home theater systems.

**New! CM Series**

If you want a speaker to impress as a piece of furniture in addition to performing as an instrument of sound, the CM series is an excellent fit. The CM line features extreme refinement in sound coupled with beautiful real wood finishes. It is the obvious choice for sophisticated home theater or superlative music listening. Each model features the Kevlar midrange/bass driver and advanced Nautilus tweeter. Finished in exquisite maple or rosenut.

CM 4 TOWER

**CM 4 Towers**

With Kevlar bass/midrange, aluminum bass driver **\$749.00 ea**

With two Kevlar bass/midranges **\$549.00 ea**

**CM 2 Bookshelf**  
With Kevlar bass/midrange **\$449.00 ea**

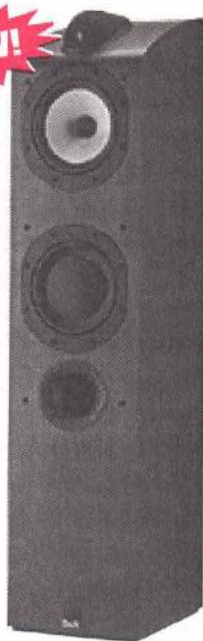

CM 2 BOOKSHELF

**New! 700 Series**

This brand-new premium speaker series provides superb craftsmanship and technology in both audio and home theater applications. Its cabinet is designed to reduce unwanted internal resonance and its new surroundless Kevlar midrange provides superior smoothness and transparency. Two new tower speakers, the 703 and 704, are offered, as well as the bookshelf 705 and center channel HTM7. Subwoofers include the ASW700 and ASW750. 703 **\$1495.00 ea** 704 **\$1100.00 ea** 705 **\$750.00 ea**

704

**Nautilus 800 Series**

B&W's best loudspeakers offer highest performance at every level. Every driver employs Nautilus tubing, and each cabinet uses the multiple-cell "honeycomb" Matrix enclosure. The result is a line of speakers that are the closest yet to musical perfection! The reference N-801 features a 15" woofer, 6" midrange and 1" tweeter. The elegant N-802 provides nearly all the performance of the N-801 in a much more living-room friendly style. The N-803 and N-804 are floor standing speakers, beautifully styled, with nearly all the performance of the flag-

N-801

ship speakers. The N-805 is a small monitor speaker that fits elegantly into any room. Come and audition the finest speakers from B&W!

- N-801 **\$5495.00 ea**
- N-802 **\$3995.00 ea**
- N-803 **\$2495.00**

**DVD C-740 5-disc DVD** changer Wonderful flexibility for movies and music! A superb quality player with progressive scan video output and Burr-Brown DACs. MP3 and CD-R/RW playback compatibility too! **\$299.00**

Add Faroudja video processing for enhanced picture quality with the **DVD C-8430! \$399.00**

CD-585

**CD Changer**

**CD-585 5-disc Changer** Load up five CDs and you've got half a day's entertainment! High quality, exciting sound and top-notch convenience at a good price make this a bargain! **\$149.00**

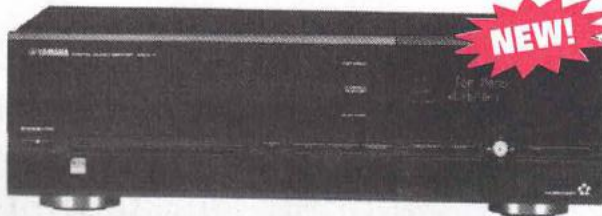

HD-1300

**CD Recorder**

**HD-1300** Convenient single tray operation lets you record up to 30 hours on its hard drive and then customize any part of those 30 hours to make your own discs! Make copies of tapes, vinyl records, or radio programs. Copy CD discs for portables and the car! Fun to use. **\$799.00**

**Yamaha MusicCast - World's First Multi-Room Wireless Music Network**

Yamaha has the ultimate CD changer/recorder! Store 1,000 CD's on its hard drive, copy CDs, create your own music compilations, or broadcast

MCX-1000

music all over your house! Yamaha provides the means with the new MCX-1000 digital audio server and MCX-A10 digital audio terminal (also known as a "client"). Store your family's music on the server's hard drive, and access it all with an on-screen display for artist, album, genre or song. Program any mix you wish. Think of the server as a CD player/recorder that can also broadcast to other rooms of your house. The

MCX-A10

server can play up to eight music programs simultaneously, "music casting" a program to client receivers in up to seven other locations. You may also select your music programs from any client location, making it unnecessary to visit the main server. If you wish, you can even record custom CDs on the server. This amazing innovation will change the way you

record, select and listen to music!

**Come in for an awesome demonstration today!**

MCX-1000 **\$2195.00**

MCX-A10 **\$595.00**

MCX-A10 with optional speakers

## 21<sup>ST</sup> CENTURY TVs ARE HERE! Hang on the wall television

### FUJITSU Plasma TV Monitors

The Stereo Shop has the best high definition plasma televisions. These TVs are like windows, with pictures so realistic you feel you can reach right into the scene itself! FUJITSU is the premier video innovator of "hang it on the wall" TV! Fujitsu's strength lies in the electronics incorporated in each of their plasma display panels. In addition to holding hundreds of patents on glass technology, Fujitsu also holds over 300 patents pending for the electronics that bring the picture to breathtaking life!

# FUJITSU

Fujitsu's picture is among the very best available because their AVM single-chip advanced digital video processor practically eliminates motion problems and flicker, and reproduces natural movement easily. Its built-in line doubler converts NTSC signals using different processing methods for moving and still pictures, resulting in smoother images without visible scan lines. You will not believe how clear and lifelike Fujitsu has made your TV experience! At just less than 4" deep, these TV monitors remove virtually all installation barriers, making them ideal for custom installations. This is your window to the future of entertainment!

**LOEWE — HD Televisions**

**Loewe TVs**

For 75 years, Loewe (pronounced "loo-va") has been a leader in the European electronics industry. Now, Loewe stands at the forefront in developing and applying the latest digital advances. By eliminating most analog components, Loewe televisions have superior sound and picture, whether the source is analog or digital. Loewe TVs use progressive scan to process and display a picture in one electron beam pass, 60 times per second. The old way, interlace scanning, requires two passes, slower and producing picture defects. These TVs are HDTV ready, and can be connected to the next generation of video inputs. Loewe provides the best direct-view experience today and tomorrow.

38" Aconda HDTV monitor

**38" Aconda** - This stunning television set boasts levels of performance and flexibility that do justice to its elegant design. It's a full HDTV monitor, and also processes NTSC material, deinterlacing it and displaying it at 480 p for a dramatically smoother picture. **\$3,995.00**

New! Generation  
Powered Towers

Dramatically improved performance in bipolar towers with built-in side-firing powered subwoofers for music and home theater! For big sound so real you are there! The new Definitive BP7000SC and BP7001SC are the most refined example of this technology. This combination of high resolution, magnificent sound-staging, awesome bass and explosive impact envelops you in the ultimate listening experience! The built-in Supercube subwoofers include heavy-duty driver and radiator cones. Built-in amplifiers power the subwoofers, so your receiver or amplifier will only need to handle the midrange and highs. These speakers have an almost magical ability to recreate a stunningly realistic holographic soundfield!

BP7001

**BP-7000SC** towers with 14" Supercube subwoofer, 1,800 watt amp **\$2,499.00 ea**

**BP-2006TL** towers with 8" subwoofer, 250 watt amp **\$599.00**

C/L/R 2300

## Powered Centers

The same idea, powered subwoofer in the cabinet, is here in the C/L/R center channel home theater speaker series. These are true, full-range loudspeakers that realize the performance potential of center channel material as the director intended it to be heard. Your movies will be incredibly dramatic as a result!

**C/L/R 3000** – with 10" subwoofer, 150-watt amp **\$999.00**  
**C/L/R 2500** – with 8" subwoofer, 150 watt amp **\$799.00**  
**C/L/R 2300** – with 6" subwoofer, 150 watt amp **\$599.00**

## Surround Speakers

Definitive's bipolar speakers are simply the best available. Each is a true bipolar system containing two complete full range speaker systems, angled on each side of the cabinet. Bipolar technology is superior for surround speakers because it synergistically combines the performance advantages of direct radiating and dipolar speakers into one ideal system, which delivers superb sound for every listener.

Feast your eyes and ears on Mythos, a revolutionary new concept in high-performance, super-elegant lifestyle loudspeakers! It begins by answering the need for upscale, on-wall and tabletop loudspeakers to go with plasma TVs and then proceeds from there to provide a cutting-edge styling statement tower

loudspeaker which sounds even better than it looks, complements everything and literally redefines the concept of floor-standing loudspeakers! Place Mythos One towers along side your plasma TV, or hang the Mythos Two speakers on the wall. Add the Mythos Three center channel and Mythos rear channel speakers, and you have an elegant, gorgeous home theater fashion statement!

*Definitive Technology*<sup>®</sup>  
The Leader in High-Performance Loudspeakers<sup>®</sup>

- Mythos Two **\$499.00**
- Mythos Three **\$499.00**

**CONRAD-JOHNSON**

The reputation of Conrad-Johnson in the audiophile community is their unmatched ability to convey the emotional content of the musical experience. Their claim to fame is their marvelous, reliable tube and transistor preamplifiers and power amplifiers, which sound absolutely glorious! Conrad-Johnson products are in the rarefied realm of "the absolute best," and their focus is on bringing demanding music lovers the most accurate sound possible. The Stereo Shop is proud to be Connecticut's only Conrad-Johnson representative, and we have their full line of exquisite components for your evaluation

MV 60 power amplifier

**Tube Power Amplifiers**

**Premier 140** - This is a music reproduction instrument designed to meet the needs of audio industry professionals and other audiophiles who require near perfection from their reference systems! The latest in the highly-regarded Premiere series of vacuum-tube power

**Solid State Power Amplifiers**

**MF-2250A** - At 120 watts per channel, plenty of power and fantastic sound. **\$2,495.00**

**MF-2500A** - With 240 watts per channel, this amp is the C-J powerhouse! **\$3,695.00**

**Tube preamps and solid state power amps: a great combination**

A lot of people are making the most out of their systems. If you have a solid state amp, just drop in a Conrad-Johnson tube preamplifier and prepare to be amazed and pleased! The inherent musicality of the tube preamp combined with the power and speed of a solid state power amp brings the best of both worlds together for truly wonderful sound! Try it!

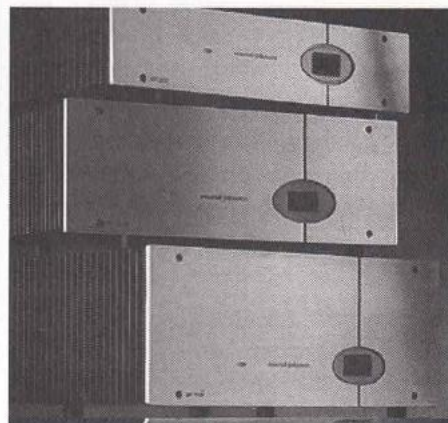

Premiere 17 LS-2

**Tube Preamplifier**

**Premiere 17 LS-22** - Tube instruments traditionally have been perceived as having an elusive, musical quality absent in solid state designs. There is a euphonious, emotional involvement with reproduced music that many enthusiasts seek and only find with the highest quality tube components. The Premiere 17 LS preamplifier is the finest example of this, and as such is the centerpiece of a two-channel music system whose purpose is to emotionally involve the listener completely in the musical experience. This preamplifier can completely transform any music system into something finer, bringing a depth and breadth to the listening experience that was missing before. This is a transcendent musical instrument! **\$4,495.00**

amplifiers, the Premiere 140 is the proverbial iron hand in a velvet glove - capturing delicate textures and subtle nuances while demonstrating muscular power, authority and control. Redefine your expectations with the highest level of quality in tube amplification. With 140 watts per channel, this stereo amplifier sets the standard of performance in the lucid and true-to-life presentation of music. **\$6,795.00**

**MV 60** - At 55 watts per channel, this is a refined, surprisingly powerful amplifier that will drive all but the most difficult speaker systems for years of great listening pleasure! **\$2,795.00**

**conrad-johnson**  
It just sound right.

## Tivoli Audio

**Tivoli Model One** – This beautifully styled small mono table radio can fill even a large room with natural sound. The Model One uses a state of the art, discrete-component FM tuner resulting in better reception with increased clarity. With its precise, easy to use analog tuning you can enjoy the maximum number of listenable stations. **\$99.00**

**Tivoli Model Two** – Similar to the Model One, but with an additional Companion Speaker, this is a stereo radio. You can separate the two speakers up to fifteen feet apart for great sounding stereo. You can add the Model CD and Model Subwoofer for a fantastic mini-system! **\$159.00**

**Tivoli Model Three Clock Radio** – This is a great-sounding clock radio, with the same simple features and beautiful wood finish as the other Tivoli radios. It includes a 20-minute sleep timer and snooze button. It can be the heart of a mini-system by adding a companion speaker, Model CD and Model Subwoofer! **\$199.00**

### B&W DM 303

Listen to music as it was meant to be heard, with this beautifully made and affordable small speaker! **\$149.00 ea**

### Grado Headphones

Designed to resolve the smallest detail at any sound level. Grado reference headphones, **starting at \$65.00**

## PianoCraft by Yamaha

A lot of fine craftsmanship goes into this compact, high-quality system with an AM/FM stereo receiver with 50 watts per channel, a separate 3-disc CD changer, and 2-way bass-reflex speaker system. For truly great sound in a small package, this system must be heard to be truly appreciated! **\$595.00**

### Delta Audio

SCA 300

SCA 150

## Tributaries Audio Cables

Have you ever shopped for wine in a wine shop? Like most of us, you have probably seen a bewildering array of wines in a variety of vintages and styles. Most of us aren't experts, however, and spend a lot of time deciding which wine to purchase only to find out it wasn't what we expected. The same could be said of wire and cable. Most wire and cable companies offer a large range of products that customers have a hard time understanding. Tributaries offers a solution to all these confusing choices. They designed their product line with three different levels of performance – "Good, Better, Best." **Starting at \$39.95 ea**

- Good** – Delta series – individually tested, hand-soldered with lots of shielding
- Better** – Direct series – similar to Delta, with larger conductors and more shielding
- Best** – Silver series – added are silver-plated conductors, silver solder, and more shielding

**Don't leave The Stereo Shop without some Tributaries. They make your system better!**

QUALITY • KNOWLEDGE • EXPERIENCE

### ARCAM - Sophisticated Audiophile Craftmanship from England

For over 25 years, Arcam has been known as the UK's foremost manufacturer of hi-fi electronics. They have earned an international reputation for innovation and high performance. These components are for the true connoisseur, who appreciates refined craftsmanship and pure musical sound. We are pleased to offer these wonderful products to our American customers.

CD82

#### Arcam CD players

Arcam offers several CD players that incorporate sophisticated design techniques to ensure that factors such as clock accuracy and jitter, power supplies, digital filters and audio output stages are all optimized to extract the fine detail and depth of sound absent from many other high end designs. With these superb CD players, you will discover new life in even the oldest CDs you haven't played in years. In addition to their excellent electronics, these components are attractively built with a weight and heft that attests to their superior quality in every respect.

#### Arcam Integrated Amplifiers

Arcam has available excellent integrated amplifiers for systems that demand versatility and superb sound. They feature large toroidal transformers for great bottom end and sound stage, and provide for many inputs, including tape loop and phono. Like all Arcam products, they are heavily built for long life and maximum performance.
