Holiday Special

Purchase a Yamaha RX-A1070, RX-A2070, RX-A3070 and add a WXA-50 MusicCast for only \$349. Save \$150 when purchased together.

Ends Jan. 31, 2018

Insanely Great

Streaming music such as Pandora, Spotify, SiriusXM, Internet Radio, is something we all love, but it's been so hard to use. Finally Yamaha with their award-winning app, has made streaming music, easy-to-use and sounds insanely great.

Connect the Yamaha WXC-50 to your existing A/V or Hi-Fi receiver and link it to current home Wi-Fi to create a powerful streaming audio system

Yamaha WXC-50 \$349.00

Streaming Made Simple

STEREO SHOP RECOMMENDED SYSTEMS

YAMAHA/ GOLDEN EAR SOUNDBAR System #1

Today's televisions are offering really bad sound quality, and the "Soundbars" that the Big-Box stores sell don't quite cut it either. The Stereo Shop has found a great solution featuring an easy to place,

slim-line Yamaha Home Theater receiver with the revolutionary Golden Ear 3D Sound Array speaker system. The secret to the better sound is delivered by their famous ribbon type tweeters that provide an incredible amount of detail, and its slender cabinet design

allows it to be hung neatly on wall for even the most challenging installations. A powerful and compact

Definitive SuperCube subwoofer rounds out this great sounding system. You can add a pair of matching Golden Ear SAT 3-C compact speakers to have a 5.1 system too! **Complete System \$2195.00**

YAMAHA/DEFINITIVE Home Theater System #2

Step up to a more powerful and flexible Home Theater system featuring Yamaha AVANTAGE surround receiver with Definitive satellite speakers and their SuperCube powered subwoofer. The Yamaha RX-A770 full-size receiver with 90 watts of power for each of its seven channels for a total of 630 watts provide more than enough to power the compact, high quality Definitive Pro Monitor speakers, and they will delight you with its performance with movies and music alike.

Internet radio and PANDORA music streaming, and the ability to control the receiver with your Smartphone are included. 4K video compatibility is also featured for all types of flat panel televisions.

Complete System \$2495.00

ROTEL/SONUS FABER System #3

This is a great sounding stereo system for music lovers that are looking to step up from the ordinary. Featuring separate power amplifier and preamplifier components from ROTEL; they have been consistently been manufacturing some of finest sounding products for over fifty years. Their powerful 200 watt/channel amplifier with a versatile and musical sounding preamplifier are connected to the Sonus Faber new Venere 2.5 slim tower loudspeakers. These speakers look like works of art with their cabinet designs, and deliver a phenomenal musical performance that is complimented by the ROTEL separate audio components. **Complete System \$7345.00**

Triton Reference

The new Triton Reference is their hallmark of the Golden Ear lineup, and is an evolution of everything that they have achieved, but taken to a stunning new level of sonic performance and sophisticated visual design. All the components in the Reference - the active sub-bass drivers, upper-bass/midrange drivers, and highly acclaimed ribbon tweeter - are new, and have been specifically developed for use in the Reference. When we first listened to the new Reference, they blew us away with the huge imaging, and the soundstage was deep and extended well beyond the speakers. Their famous ribbon tweeter mounted in the middle of cabinet is aligned perfectly and delivers a smooth, but accurate rendition of your favorite music, the built-in 1800 watt amplifier powers the woofers with authority, and with the rear mounted volume control allows you to tailor it to your liking. **\$8498.00/Pair**

Triton Five

The Golden Ear Triton Five is a larger version of their Award Winning Triton Seven, with greater dynamic range and even deeper bass extension, plus important refinements carried over from their Triton One. It is their largest tower without their powered woofers; however the bass from them is tight, deep, and accurate that will leave you satisfied, regardless of your musical tastes. The Triton Five's high-resolution sonic performance makes it ideal for use in all audio systems of the highest quality, and will deliver exceptional performance with even moderately priced receivers, while also allowing you to appreciate the subtle qualities of the world's finest audio components. **\$1998.00/Pair**

GoldenEar Technology®

A Passion for Sonic Perfection™

Triton One

The Golden Ear Triton One is a superb, Loudspeaker-of-the-Year award winning reference home audio and home theater loudspeaker that has performance equal to, and in many cases surpassing, speakers selling for ten times its cost. Measuring in 54" in height, the Triton One has evolved from their rave reviewed Triton Two, with larger drivers, and more power to the improved bass section of the loudspeaker. A great sounding loudspeaker for either Home Theater or stereo system, the Triton One is the perfect choice for all music lovers. **\$4998.00/Pair**

Triton Seven

The Triton Seven brings Speaker-of-the-Year Award winning Triton Series performance into a more compact size, measuring in less than 40", and even to a more affordable price range. The music that comes from these marvelous small tower loudspeakers will have you grinning from ear to ear every time you listen to them, and makes it the perfect choice for high quality two-channel systems. Add their matching center channel, and rear speakers, and now you have a Home Theater system that you will be proud to own for years to come. **\$1398.00/Pair**

Triton 2+

Golden Ear's Triton Two Tower clearly set the audio world on its proverbial ear with extraordinary sound quality, elegant styling and previously unimaginable value. It has earned an incredible series of rave reviews and industry accolades from around the world — including more than a few Speaker of the Year and Audio Product of the Year honors and awards. The Triton Two+ is newly updated to now incorporate many of the new technologies and refinements developed for the Triton One, but in a smaller 48" cabinet with smaller woofers, and less power for them. An insanely great value and a large step up in musical performance over the Triton Two. **\$3498.00/Pair**

SuperSub X Subwoofer

The folks at Golden Ear have re-written the rule book when it comes to building high-quality, compact subwoofers. Their goal was to create a beautifully styled, finely finished, reasonably sized subwoofer that could generate accurate and precise low frequency performance that is both highly impactful and extremely musical. And with the SuperSub X, that is exactly what they accomplished! Measuring in at only 12 ¼" cubed, it just seem to disappear. However when you turn it on; wow! Simply put, the SuperSub X is a great choice for anyone that desires a great sounding subwoofer for any application, movies or music. **\$1249.00**

STEREO RECEIVERS

NEW

Yamaha RN-303

The Yamaha RN-303 is a nifty little stereo receiver with flexibility and a great sound that embarrasses much more expensive offerings. Rated at 50Watts per channel, the RN-303 amplifier delivers a nice pleasant sound that comfortably powers bookshelf and slim tower loudspeakers with ease. And now offering Internet Radio with Pandora and with the ability to control it easily with your Smartphone makes it an even better buy. It also includes a good sounding tuner, and enough input connections complete its outstanding value.

\$299.95

Yamaha RN-602

NEW

Are you looking to replace your existing stereo receiver and were disappointed with the choices available today? Look no further, with the Yamaha RN-602, your search is over! With a powerful 80 watt per channel amplifier, using high-quality discrete output devices, the RN-602 will sound great whether you are connecting a modest bookshelf or a large tower loudspeaker. Plenty of connections are found here with this receiver, including a nice sounding phono input for your turntable. What makes the RN-602 exciting is the Internet radio feature, which allows you to listen to music from all over the world, all the while controlling it from the comforts of your chair with your Smartphone!

\$599.95 RN-803 \$749.00

YAMAHA CD PLAYERS

Yamaha CDS-300 CD player

The Yamaha CDS-300 is a great choice for anyone that is assembling a nice music system, but is looking for something that does not take up a great deal of room on their shelf. The CDS-300 is a very musical sounding player featuring high-quality D/A converters, and even a USB input on the front panel to allow connecting your computer or phone to make them sound their best is also found here with the CDS-300. A nice remote control is also included for easy and convenient operation. **\$299.95**

Yamaha CDS-700

The Yamaha CDS-700 is the perfect CD player for the music lover that is looking for a better sounding, and constructed CD player. When you first pick it up you will notice that it feels heavier than its size would dictate. Larger and heavier power supplies and a silky smooth drawer transport are found here. The aluminum front panel helps isolate RF interference while giving it an elegant appearance, and the front panel USB allows you to easily connect your portable music device or computer, and using Yamaha's superior D/A converters for the best sound quality. **\$799.95**

Yamaha CD-C600 Five Disc CD Changer

The Yamaha CDC-600 CD changer provides exciting sound quality, while offering the convenience of loading up to five CD's and having the ability to be able to listen to your favorite music without interruption. And with their exclusive Play Exchange, allows you to change up to four discs while the fifth one continues to play! A full featured remote control is also included to easily operate it as well. **\$329.95**

B&W Bowers & Wilkins

NEW 600 SERIES

683S2

The 683S2 is the largest speaker in the 600 Series. This floorstander is ideal for audiophile stereo and home theatre applications in larger rooms, delivering serious performance and amazing value. It features dual 6.5 aluminum cone woofers, for richer, distortion-free bass response. And is coupled with their famous FST Kevlar midrange for clarity that is unmatched by its peers. The aluminum dome tweeter is a new design featuring a double dome that uses an extremely thin aluminum dome for lightness, surrounded by a thicker aluminum ring for rigidity. The musical detail from it will amaze you.

\$1650.00/Pair

685S2

The 685S2 is the larger bookshelf loudspeaker, at home on a stand or bookshelf, the versatile 685 S2 is ideal for stereo and home theatre uses in most rooms, measuring only 13.5" in height. A 6.5" Kevlar woofer provides a tight, deep bass that will surprise you for its size. And the aluminum dome tweeter delivers a sweet and clear midrange and top end.

\$695.00/Pair

686S2

The 686 S2 is the most compact speaker in the series, but don't underestimate its power and precision. It measures only about a foot, but delivers a nice punchy bass that even larger bookshelf loudspeakers would be hard pressed to match. The aluminum dome tweeter provides all of the clarity and detail that will delight.

\$550.00/Pair

700 SERIES

702S2

NEW

The 702S2 is their top model in this new exciting series of loudspeakers; it brings the goose bump-inducing clarity and detail of studio-quality sound to your home audio or Theater set-up. Borrowing heavily from their new 800 Series products, it features their tweeter on top design, like the 800 Series. The tweeter's dome is an all new, manufactured from aluminum and carbon for an extended response that will provides gobs of detail in your music you never knew existed. The Continuum midrange cone, also from the 800 Series, is the biggest change in performance since Kevlar, for a more open midrange. And the all new Aerofoil woofers provide a deep, dynamic bass.

\$4500.00/Pair

703S2

The 703 S2 has both the grace and power to bring every element of your music to life, from delicate nuances to monstrous bass lines, with the new Aerofoil dual 6.5 inch woofers. The Continuum midrange is borrowed from their 800 Series for life like clarity, and the aluminum tweeter braced with carbon reveals spine tingling highs. They are available in Rosenuit wood, Gloss Black, or Satin White Finish.

\$3500/Pair

704S2

NEW

Looks can be deceiving. Despite its slim dimensions, the 704 S2 has the commanding presence of a much larger speaker. It is a three way tower, with dual woofers for tight bass, the new Continuum midrange directly from their 800 Series. And the newly developed aluminum/carbon tweeter; music played thru them is a revelation, with details picked out in pin-sharp detail and with exceptional realism.

\$2500.00/Pair

800 SERIES

805 Diamond

The exceptional 805 Diamond is their bookshelf speaker in their lineup to receive studio grade technology. It's capable of delivering pristine sound and bass response that will have you looking where the subwoofer is. Powerful and dynamic; the 805 Diamond is only compact in size; not in sound. Now music lovers with smaller listening areas can now experience true studio sound.

\$6000.00/Pair

804 Diamond

The 804 D3 floorstanding loudspeaker delivers an incredibly high-performance sound with a smaller footprint, making it easier to place in your listening area. The striking, tapered cabinet forms an ultra-rigid foundation for their all new driver compliment. They play host to a top mounted Diamond tweeter for beautiful highs, with detail and air. The new Continuum cone midrange, replacing their iconic Kevlar driver, for a new sense of clarity and realism that will have you believing your favorite performer is playing just for you in your personal listening area. And the new Aerofoil woofers provide tight and an accurate bass response, all of these come together to generate a highly satisfying and engaging musical experience.

\$9000.00/Pair

803 Diamond

After eight years of exhaustive and intensive research, the engineers at Bowers and Wilkins have created one of the most anticipated releases in audio history; and with this new amazing loudspeaker, the 803 D3, it was well worth the wait! Over 800 changes have been implemented into this new lineup, with virtually nothing carried over from the previous series. The sound is nothing short of spectacular! Every part of the musical performance has been brought to a higher level; it is almost like a veil has been lifted and subtle details in the recording are now easily apparent. You must make time to come to The Stereo Shop today, and hear what you have been missing.

McIntosh

NEW

McIntosh MC-452 Stereo Power Amplifier

With 450 watts per channel of power, the McIntosh MC-452 is their most powerful stereo amplifier and features the latest advancements in circuit design, such as, the Quad-Balanced design which cancels noise for an impeccable audio performance. Their patented Power Guard circuit prevents this amplifier from being overdriven and dam-

aging your loudspeakers. Also the MC-452 amplifier features Auto-Former outputs, which improve power transfer to speakers, make the amplifier less vulnerable to varying power and more stable for many years of operation. This amplifier is a prime example of what it means to be "built like a McIntosh" and why people say a McIntosh is "the best". **\$8500.00**

McIntosh MAC-7200 Stereo Receiver

The McIntosh MAC-7200 is their first stereo receiver since 1993, and is made to exceed the needs of the next generation of music lovers. It was designed to deliver sound comparable to separate components, but in a one chassis design to save valuable shelf space. With 200 Watts per channel, featuring their patented Autoformer design will drive any speaker with ease, and sound wonderful doing so. The MAC-7200 is sure to provide you with enough connections and modern technology to keep all your music components connected and sounding great, including an ultra-high quality 32Bit/192Khz DAC for your digital sources, which can be easily upgraded when newer DAC's are available. A sensitive and wonderful sounding tuner completes this amazing receiver. **\$7,000.00**

NEW

McIntosh MCT-450 CD/SACD Transport

Get the most music from your CD collection with the McIntosh MCT-450 transport. This transport can be connected to the MAC-6700 receiver, or any of their preamplifiers that include their built in DAC. The MCT-450 is also a versatile machine that can play both CD and SACD (Super Audio CD); most audiophiles agree that SACD is the ONLY way to experience music to its fullest. A twin laser optical pickup assures optimal disc playback, while a 2X read speed provides better reading of scratched or damaged discs. Your CD's are carefully handled by a premium aluminum die cast tray, and the entire unit is housed in the classic McIntosh styled, polished stainless steel chassis with a black glass front panel and aluminum end caps. **\$4000.00**

McIntosh MC-302 Power Amplifier

The McIntosh MC-302 power amplifier is a true audiophile amplifier with 300 watts per channel will drive any speaker system with ease. It is designed to deliver decades of legendary musical enjoyment thanks to its outstanding build quality and advanced technical performance. Visually, the MC302 shares the same timeless design cues as their other products. The polished stainless steel chassis, classic black glass front panel, knobs and brushed aluminum end caps all compliment any room. Their captivating classic blue VU meters are not only beautiful to look at, but provide an accurate reading of its output. Upgrade or build the systems of your dreams with a McIntosh amplifier today! **\$6500.00**

McIntosh C-2600 Vacuum Tube Preamplifier
