

CELEBRATE THE GREAT INDOORS THIS WINTER! GET A STEREO SHOP SYSTEM!

FOR OVER 35 YEARS, WHY DO PEOPLE BUY AT THE STEREO SHOP?

Because we're the only store that will:

- Make you feel comfortable with our home-like atmosphere!
- Completely explain and demonstrate high-quality audio/video!
- Work with you to design your personal home entertainment systems!
- Install any system, from the smallest to the biggest multi-room/home theater concept!
- Provide guaranteed service both on-premise and at-your-door!
- Be around for a long, long time when your needs change!

**COME ON IN AND VISIT THE ONLY
AUDIO/VIDEO STORE AROUND THAT HAS
THE GOOD OLD-FASHIONED EXPERIENCE
AND KNOW-HOW TO BRING YOU WHAT
YOU DESERVE - THE BEST!**

THE RIGHT COMPONENTS AT THE RIGHT PRICE!

FREE TV FOR A FULL YEAR!

NO MONEY DOWN! NO PAYMENTS! NO INTEREST!

SURROUND SOUND FOR EVERYONE!

Few things are as pleasurable and relaxing as watching a movie at home on a high-quality surround-sound home audio/video system. But it doesn't have to cost a lot of money to turn your TV into a movie theater! I have spent a lot of time matching components for the best quality, highest-value surround-sound audio systems at various price levels. They're easy to install and take up little room. Just add your TV and hi-fi stereo video cassette recorder and you've got great home entertainment! Here are three excellent systems to consider:

Yamaha/Boston Acoustics

Without a doubt, this is the highest-value surround sound receiver/speaker system combination available.

YAMAHA RX-480

Boston Acoustics

BOSTON ACOUSTICS SURROUND SPEAKERS

The **Yamaha RX-V480** is a fully discrete-circuitry Dolby Pro Logic surround sound receiver with 65 watts per left, center and right front channels and 15 watts per rear left and right channels, perfect for the efficient **Boston Acoustics** 6-speaker surround system. The 5 small front, center and rear speakers can be placed anywhere, on or off their stands, and the subwoofer provides bass you can really feel.

System Price: \$1175.00

Adcom/NHT

For a very high-quality "home theater stand-alone" system with plenty of

power, the next major step up features the **Adcom GSP-560** surround sound processor/power amplifier, **Adcom GFA-535** stereo power amplifier and the great **NHT** surround sound speakers.

ADCOM GFA-535

Here's how it works: Connect your hi-fi VCR to the **GSP-560**, which contains the processor and three amplifiers: 80 watts for the critical center channel and 40 watts for each rear channel. Add the **GFA-535** 60 watt per channel amp for front left and right channels.

NHT SURROUND SPEAKERS

For seamless, three-dimensional surround sound, **NHT** offers an entire, integrated speaker system: front **VT1** mini-towers 40" tall with the tiny footprint of only 5.5" X 5.5"; the **1C** center channel speaker, the **HDP1** rear channel speakers, and the **SW2P** subwoofer for room-filling bass. **System Price: \$2,695.00**

ADCOM GTP-600

Adcom/B&W

For ultra-high performance at an affordable price, the great new **Adcom GTP-600** preamp/tuner makes separate components as convenient and easy to use as a receiver. Just add the new 5-channel **Adcom GFA-6000** power amplifier, and you have 420

watts for a superbly balanced, high-powered sound stage that emotionally draws you into the movie!

Add the refined **B&W** home theater speaker system: for front left and right channels, the floor-standing **DM620s** with 8" woofer, 8" radiator and 1" metal tweeter are dramatically musical and provide deep bass.

B&W DM620

The **DM600IFS** for the front center dialogue channel is the perfect match for seamless cinema sound. And the **DM600i** rear surround speakers are ideal for creating an enveloping sound stage that will totally involve you in the home theater experience. **System Price: \$2,995.00**

Velodyne

VELODYNE SUBWOOFERS

Velodyne Subwoofers

And keep in mind, for the finest bass performance in any system, the **Velodyne** line of subwoofers is the only answer. Add one to your system, starting at \$749.00. You'll be glad you did!

And that's just the beginning. We have lots of other fabulous surround sound audio systems you can add to your TV and VCR for great home theaters. The Stereo Shop makes it easy to help you enjoy a high quality of life with high value, easy-to-use audio/video products and service. Stop in any time. I am always happy to demonstrate these great systems and answer any of your questions.

LET'S GET SMALL!

Satellite Speaker Systems

One of the greatest benefits of today's audio technology is that you can get big sound from small speakers! If you want great sound in any room, there is no need to take up space and take away from your decor with big, intrusive speakers. The Stereo Shop can help you choose a "satellite speaker system" that can be placed just about anywhere to fill the room with music. Simply put, instead of having two large speakers for all the bass, midrange and treble, a satellite speaker system provides all the sound with three smaller speakers. You position two of the small speakers (called "satellites") containing midrange and treble like a normal stereo pair, and the third speaker (called a "subwoofer") providing all the deep bass can be hidden away. You only need one speaker for deep bass, because deep bass is omnidirectional, and can be heard well anywhere in a room. This arrangement makes it far easier to put good sound in any room. Another great thing about "satellite speaker systems:" Just add a center channel and two more satellites for the rear and you have a home theater speaker system!

Boston Acoustics

Boston Acoustics is one of America's most successful speaker designers, and has won awards and recognition from just about every industry publication, including the consumer magazines, for their innovative engineering, value, and above all -

BOSTON ACOUSTICS SUBSAT SYSTEM

sound! Boston has devised the incredible **SubSat** system, a small, three-piece speaker system (available in black or white) that literally can be placed anywhere in a room and sounds fabulous! Put the very small satellites (8 1/2" X 5" X 5 1/4") on a shelf or on a wall! The subwoofer is so small it can be easily hidden, and yet will fill the entire room with deep, rich bass! These speakers will complement any decor, and can even be painted to match your color scheme! The **SubSat** speakers come in two varieties, the **SubSat Six II** and the **SubSat 7**. The **SubSat 6 II** is among the finest speakers available for under \$500.00 and The Stereo Shop is offering it for a limited time at only **\$399.00!** For higher power-handling and even deeper bass, choose the **SubSat 7** at **\$695.00.** For a truly amazing home theater speaker system, add two more satellites for the rear channels and the **Boston Acoustics CenterSat 6** or **CenterSat 7** for the center dialogue channel.

CANTON

Canton of Germany is world-famous for handcrafted satellite speaker systems and superb sound. For many years, we have offered their classic satellite speak-

CANTON PLUS S/PLUS C

er system, the **Plus S/Plus C** system, with the biggest and best sound of any system we've heard for its size. This system will also complement any decor with its

small dimensions and choice of rich lacquer (black or white). The **Plus S** satellites are very small (8" X 4" X 4 1/4"), and can be mounted on shelves or walls. The **Plus C** subwoofer contains a 12" woofer for very deep bass. And brand-new

CANTON FONISSIMO \$749.00

from **Canton** is the revolutionary **Fonissimo**, impossibly small with incredibly rich bass, and unheard-of sound for its size! The satellites are a mere 5" X 5" X 5 1/2" and function as coaxial units with the tweeter concentrically positioned in front of the midrange driver! The subwoofer is astonishingly compact (11 1/2" X 8 1/4" X 13"), yet it provides room-filling bass at impressive volumes. Both **Canton** systems can be expanded for home theater by adding rear speakers and a center channel.

So you see, these small speakers can do quite a lot! Whether you want a satellite speaker system for music or want to put together a home theater system, The Stereo Shop makes it easy to help you enjoy a high quality of life with high value, easy-to-use audio/video products and service. Stop in any time. I am always happy to demonstrate these great systems and answer any of your questions.

AUDIO/VIDEO INTERIORS

Home Theater Receivers from Yamaha

If you're interested in top-notch

surround sound for home theater, **Yamaha**, one of the industry leaders in home electronics, has the perfect lineup of high-quality receivers with cutting-edge technology for home theater. Their new audio/video receivers set new standards for the home theater experience with **Yamaha's** patented **CINEMA DSP** (digital sound field processing) technology.

Yamaha added to standard Dolby Pro Logic surround sound by creating the ambiance of a larger space with **CINEMA DSP** sound fields for both front and rear channels. So, unlike other systems that try to make your room sound like a concert hall or large theater, **Yamaha's** high-fidelity digital sound field processing actually puts the hall's sound field inside of your room, dramatically increasing your realistic experience with both movies and music. **CINEMA DSP** is a truly significant step in home theater technology.

YAMAHA RX-V1070 \$1,295.00

Yamaha RX-V1070

This model has been praised as the world's most sophisticated receiver, and it is packed with ultra-refined performance, **CINEMA DSP** technology and almost 400 watts of power!

YAMAHA RX-V670 \$649.00

Yamaha RX-V670

For an even more affordable **Yamaha** home theater receiver with **CINEMA DSP** technology, this model provides Enhanced Dolby Pro Logic and 260 watts.

YAMAHA CDC-645 COMPACT DISC CHANGER \$299.00

In addition to these high-technology new home theater receivers, **Yamaha** also offers excellent components such as a laser disc player, hi-fi receivers, cassette decks and compact disc players, all designed to function with **Yamaha** system-wide control from a single remote. Come on in and check out the new **Yamaha** line at The Stereo Shop!

Yamaha Compact Audiophile System

This great new personal component system from **Yamaha** is perfect for office, kitchen, bedroom, college dormitory, vacation home - anywhere space is at a premium and great sound is a must! Fully remote controllable, the system features a receiver, compact disc changer and cassette deck. These components are crafted with famous **Yamaha** quality. Excellent sound and plenty of power rival costlier full-size stereos, and you can place them just about anywhere!

YAMAHA

YAMAHA CC-90

Come to The Stereo Shop to learn all about the new big screen TVs, the new 18" satellite system and surround sound receivers and loudspeakers. We are uniquely positioned to provide you the very best in home entertainment with our superior equipment, service and custom installation expertise. I can help you design a home theater or multi-room installation for your home that incorporates state-of-the-art technology for the finest in home entertainment. We feature the finest big screen TVs by **Mitsubishi**, surround sound electronics by **Yamaha**, speaker systems by **Boston Acoustics**, and other fine brands as well.

I am always available to work with you or your designer in creating a custom-designed home theater or multi-room installation that reflects your vision and taste and integrates perfectly with your living space, lifestyle and decor. Please call for an initial consultation at our expense. I look forward to meeting you.

10 REASONS TO BUY YOUR AUDIO/VIDEO EQUIPMENT FROM THE STEREO SHOP

Reason No. 1:

PROFESSIONAL SERVICE DEPARTMENT

The Stereo Shop has three essential elements to give you the best possible service on your equipment should it be needed. 1) We maintain a fully equipped factory authorized service department on our premises, staffed with highly-qualified factory-trained technicians. 2) Continuing education courses keep our staff current with the rapid changes and advances in electronic technology. Today's sophisticated circuits and electronics require sophisticated test instruments. Dual trace scopes, wow and flutter meters, distortion analyzers, alignment generators, tape test facilities and more, all a part of the more than \$50,000 investment made to protect your enjoyment. 3) You are assured of the quickest repair possible using the correct factory parts and procedures.

Reason No. 2:

QUALIFIED PROFESSIONAL SALES STAFF

The Stereo Shop sales staff receives on-going technical training so that you can be sure they know what they're talking about, and they know precisely which equipment will suit your needs. In addition, they will make sure that your system is properly installed so that you will be fully satisfied.

Reason No. 3:

RELAXED ATMOSPHERE

The Stereo Shop offers separate listening areas where you can relax and audition the equipment of your choice. Our staff will be glad to assemble and connect your selection of components. Comfortable chairs enable you to simulate a home listening environment.

Reason No. 4:

SPECIAL MAINTENANCE CLINICS

Several times a year, The Stereo Shop provides special maintenance clinics for various components at a discount. The components are examined, adjusted and cleaned, and fast turnaround time is assured. These are excellent opportunities to keep your components performing at their very best.

Reason No. 5:

PRE-OWNED EQUIPMENT AND TRADE-INS

The Stereo Shop is able to offer Hartford's only high-quality pre-owned audio department. The selection is constantly changing but bargains always abound. Check often because the best deals don't last long. See our special list in every edition of our newsletter. Because The Stereo Shop has become known as the place in Hartford to buy high-quality pre-owned audio equipment, we welcome trade-ins toward your purchase of new equipment.

Reason No. 6:

COMPONENT MATCHING AND SYSTEM DESIGN

Although you buy a component, you really listen to a system. Some components just don't sound good together: the only way you can tell is by listening. We spend a lot of time matching components for systems with best sound and value. At The Stereo Shop, you can also listen to whatever combination of components you want. We also recommend which components go well together and which will sound best in your particular listening room.

Reason No. 7:

SPECIAL SEMINARS

From time to time, The Stereo Shop provides free seminars, in which new products and technologies are explained and demonstrated. Factory experts are often present to conduct these sessions. These seminars are announced in the free newsletter The Stereo Shop publishes several times a year. Please stop by and sign up to be on our mailing list.

Reason No. 8:

WRITTEN WARRANTIES

The Stereo Shop offers a written warranty on every new component purchase. We protect your investment with a detailed contract that provides for maintenance, labor and parts.

Reason No. 9:

CUSTOM HOME AND COMMERCIAL INSTALLATIONS

The Stereo Shop has one of the largest and most experienced custom installation departments in the area. A Stereo Shop custom designed and installed home theater, multi-room installation or audiophile music system becomes an intimate part of your home. Our experts will plan and work with you, your interior decorator, architect or contractor.

Reason No. 10:

35 YEARS' EXPERIENCE

The Stereo Shop has been in business since 1959, longer than any other audio/video store in Hartford. The key to our success is the products we carry. Careful consideration is given to reliability, sound and picture quality. No matter how good the specs are, if it doesn't have a high-quality picture or great sound, it won't be sold at The Stereo Shop.

Richard
Cox

TECH CORNER "What Sounds Best?"

Many times a customer will come into The Stereo Shop, waving a stereo magazine's rave review of an individual component, and announce, "They say it sounds great! What do you think?" I will have to then ask the customer, "With what? It couldn't sound great all by itself, could it now?" The most respected stereo magazines in the world can't help your system sound better unless you know how the component with the "rave review" will sound with other equipment. You could literally spend the rest of your life hooking up all kinds of equipment trying to find the one configuration that makes not only the "great" component spring to life, but makes your system spring to life as well.

That's why it makes sense to consider how pieces of equipment work together, as a system. It's nice that leading publications will write up great reviews of components from good manufacturers, but did you think how they would interact with your present components, or how they would work with other new components? A quality stereo dealer like The Stereo Shop spends lots of time matching magnificent equipment and calibrating it with the proper cables, interconnects, acoustic panels and speaker positioning for maximum performance. But we take similar care in matching our most affordable systems as well, for any system is only as good as its weakest link. Our whole philosophy is system-based, because we know that a piece of equipment is only as good as the others it interacts with in a complete system.

The Stereo Shop has been around since 1959, from the very time stereo came into existence, and in 35 years we have examined as

many available equipment lines as we can to determine what components work best in systems at every price level. For instance, it doesn't make sense to match a high-performance pair of speakers to an amplifier that doesn't interact well with them. A perfect example of that was a customer in search of an amplifier for his pair of \$1,000 speakers. We hooked up what we initially thought was a likely preamp/amplifier combination that sold for around \$1,200.00. To our surprise the system sounded terrible, as bad as if a mediocre, cheap receiver were used. Then, we connected his speakers to a \$3,000.00 preamp/amp combo, and boy did it sound great! Of course, that price was out of line for the speakers he wanted to use - it just happened that his speakers matched well with components that cost far more than the speakers. But who would have thought it until we actually did the work to find out?

ADCOM

ADCOM GTP-450 PREAMP/TUNER AND
GFA-545 II POWER AMP \$1,100.00

So, the process can be hit and miss. But The Stereo Shop has enough experience with the characteristics of many different components to be able to readily match them up as good systems. For example, we know that the **B&W DM640** loudspeakers at \$1,500.00 are an excellent match for the **Adcom GTP-450** preamp/tuner and the **Adcom** power amplifiers. Another B&W dealer may claim that another

amplifier does as good a job at that price, but because we have done the work, we know that the Adcom cannot be topped in that combination, and that is why we match those components together.

B&W DM640 SPEAKERS \$1,500.00

So, the next time your eye is caught by a great write-up in a stereo magazine of some speaker or amplifier, try and read beyond all the fine words about that particular component. Sure, it may be a fine piece, but how did it fit in the system they assessed it with? Were they using a \$3,000 amplifier with a \$500 pair of speakers (not a real-world combination)? Then come to The Stereo Shop and we'll be happy to show you our custom matched systems and how we arrived at these balanced combinations for the best sound and value at the price. We'll be happy to talk about any piece of equipment written up in the magazines, and then show you that while the equipment we offer does appear in "recommended" and "best buy" articles, they only sound as good as the rest of the system they are part of - and they will sound good if it's a Stereo Shop system!

Until next time,

Richard Cox
